Overall very good environment at the college. Met all HOD's & understood their view & difficulties.

Area of improvements.

1. Defined programs for all high potential graduating students (BE/MBA/MCA/M.Tech)
2. Connecting the Real life projects to industry instead of some fake projects
3. Involvement of faculty specially HOD with industry
4. Run a pilot program in college organized by Dharmendra singh mandated by VC (VTU) & Dr. S G Gopalakrishna
5. Special focus on final year students training so they can be employable

Purpose of visit: Guest lecture to Civil Engineering UG & PG.

1. The college is built in a scenic environment

2. The campus is well named with individual blocks for disciplines
3. The students are in an environment of a university for learning & development
4. The facilities are well and interested in upliftment of lower level engineering graduates
5. Principal of the college is very dynamic, interested in overall growth of the college and its constituents
6. The hospitality was very good especially the food.

Good luck to the college & its stake holders.

I was first of all impressed by the cleanliness and good level of maintenance. The campus is well laid, aesthetic and capable of installing a sense of pride among the faculty as well as the students.

The initiative by Nagarjuna College of Engineering & Technology to promote industry interface with students is very commendable

The seminar itself is a very good initiative and quite unique and yet very apt in terms of a theme, benefiting an institution of engineering

Thank you for the opportunity to be a part of the event.

I am terribly impressed by the serene, green and learning environment offered by the college. I am extremely happy that department of Mechanical Engineering is

giving beyond its usual duties in organizing an International Conference of this scale.

My best wishes to the students and staff of this institution in achieving their professional goals.

I had been to this institution since its inception on several occasions and its amazing to see continuous overall updation of the greenery campus, excellent infrastructure with very good ambience for education. I am sure that, with the dynamic leadership of the present Head of the Institution, the institute will comeup with flying colours.

With best wishes.

Dr. M M Benal

I am very much impressed about the conference, which covers all binds of streams of Mechanical Engineering. The guests, chair persons present were highly knowledgeable and experts. It is observed that the head of the institution and the convener and team members have done excellent job. It is my pleasure for being part of ITETME 2014.
