Objectives / Challenges

Currently Indian Engineering education is facing serious challenges. Some of them are:

- Too many governing/regulatory bodies, AICTE, UGC, VTU, state Government, etc.

- No common guidelines, procedures across regulatory bodies.

- Issues related to admission, fee structure, entrance exams etc.

- Issues related to quality of education, appointment and retention of good faculty etc.

- Issues related to curriculum, method of teaching, incorporation of outcome based education with continuous assessment.

This Summit is a sincere attempt to create a harmonious platform to discuss and deliberate on critical issues faced by Technical Educational Institutes of India in general, and Karnataka in particular and present a workable model. Articles are invited from all the Engineering colleges highlighting the challenges to be addressed and possible solutions which will be brought out as proceedings. A summary would be presented to concerned Government bodies at both State & National level.

This summit provides a platform to discuss about micro and macro issues confronted by Technical Educational Institutes and work towards creating an effective ecosystem for quality education and sustainable Institutes.

All participating Institutes are requested to send a write-up covering (i) internal issues faced by the institute and best practices adopted to combat them (ii) institute's expectations from government, regulatory bodies, industries and the university.
